

Caretinuum™

Building on Our Strong Foundation

Caretinuum™ provides a total solution – whatever your lines of business, level of technology, capital budget and even your vision for growth. CareCentric offers a fully integrated suite of products, services, support, education and financial alternatives to enable your business success.

About CareCentric:

Headquartered in Atlanta, and with more than 35 years of technology expertise and domain knowledge, CareCentric delivers technology, business operation and IT services to providers serving the entire home healthcare continuum.

Open Technology

Caretinuum™ was designed using Microsoft® .NET – the most open, Internet-friendly platform available in the world today. With Caretinuum, you get a system whose modularity, scalability and ease of use far surpasses other applications in performance, usability and cost-effectiveness. Your employees will have easy, secure accessibility from any computer with Internet capabilities.

Unlimited Growth

Caretinuum's single platform architecture is capable of managing the financial and operational aspects of single or multiple lines of business. Support processes are the same for all lines of business. Even as you grow, users learn one system, one time – and they enter patient data only once. In addition, through our vendor partners, we offer specialized capabilities such as document management, electronic claims submission, claim denial management and CMN communications.

HIPAA Compliance

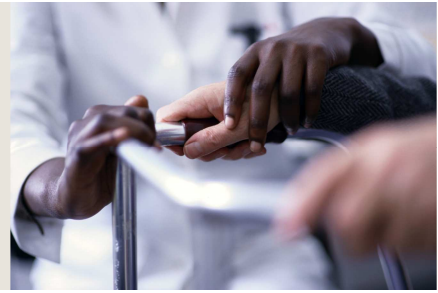

Caretinuum provides built-in PHI access audit on every patient record, tracks physician orders and supports regulatory standards. Offsite disaster recovery backup services are available to ensure complete protection of your data and are included if you choose a hosted solution.

Hosting Capability

The Windows-based, open platform enables us to host Caretinuum for you with minimal up-front capital investment. With a hosted system, we assume all the costs and responsibilities of system maintenance, performance, compliance, disaster recovery and the cost of many traditional third-party add-ons, freeing you to do what you do best – care for your patients.

Affordability

Our flexible financing options provide alternatives for any size home care provider. You may choose from among several payment options, ensuring you get the most for your budget dollars.

Point of Care / Point of Sale

Caretinum's Point of Care solution, with customizable assessments and individualized patient care planning, gives agencies a distinct advantage in outcomes-based reimbursement environments. Point of Sale software and hardware capabilities provide a total package to support HME retail sales. Both technologies offer added capabilities for the most efficient delivery of services to your patients.

Training & Support

With CareCentric, users may select a combination of training methods, including documentation, virtual classroom and traditional instructor-led training. The result – cost-effective training customized to your needs for increased employee satisfaction, productivity and long-term retention. For ongoing support, users may move seamlessly from the application to an online knowledge base with system manuals and quick-resolution e-mail. Prompt telephone access to a CareCentric support team member is only a call away.

Business Services

CareCentric offers a host of services that help you improve efficiencies and grow your business. Billing Services covers all your billing and reimbursement needs, from claim submission to denial management. Business Process Outsourcing provides daily management of your back-office and administrative functions, from accounts payable and payroll to financial reporting and treasury services. Productivity Services include thorough assessments of your computer system, business processes, and cash and collection operations. Information Technology Services takes responsibility for your total IT management needs – all delivered from our highly secure, state-of-the-art data center.

With CareCentric, you get a total solution that helps you manage your business so you can care for your patients.
