

Electronic Claims Clearinghouse Powered by ZirMed®

Through the ZirMed clearinghouse, you get access to more than 1,900 third-party payers through a single electronic portal – and the assurance that your claims will be accepted and processed quickly. This translates into a more streamlined claims process and faster turnaround on payment to your business.

About CareCentric:

Headquartered in Atlanta, and with more than 35 years of technology expertise and domain knowledge, CareCentric delivers technology, business operation and IT outsourcing solutions to providers serving the entire post-acute care continuum.

Streamlined Claims Process

- Paperless
- Improves internal workflow
- Ensures greater claims accuracy
- Cuts processing time at the payer
- Facilitates quicker turnaround of payments
- Decreases outstanding accounts receivable days

Electronic Claims Submission

ZirMed's Claims Management System provides users power over the electronic claim filing process for both professional (CMS-1500) and institutional (UB04) claims. Data can be accepted in nearly any format.

The Claims Tracking feature allows you to track the progress of the claim every step of the way. Claims are forwarded to the payer in real-time, where available. Payer claim acknowledgements are reflected via the Web. Rejected claims may be edited online and immediately resubmitted.

A Rejection Analysis engine categorizes rejected claims by the rejection reason, allowing immediate process improvement to the most significant error categories.

Electronic Remittance Notification

ZirMed receives electronic remittance files from hundreds of payers nationwide. Once the files are received, they are immediately available on the ZirMed Web site. You may automatically create payment and adjustment records in the CareCentric billing system from the data in these files. The Electronic Remittance application allows you to print an individual patient's EOB directly from the ZirMed Web site.

Eligibility Verification

ZirMed's real-time eligibility verification accurately identifies insurance coverage and co-pay responsibility at registration. Eligibility verification transactions are performed in real-time and are fully HIPAA-compliant.
