

Caretinuum™ Report Manager

Collecting data is not the end of the story. Caretinuum's Report Manager provides your company with a window into the data that empowers you with the information needed to make decisions, improve processes, enhance marketing efforts, and manage critical financial issues.

About CareCentric:

Headquartered in Atlanta, and with more than 35 years of technology expertise and domain knowledge, CareCentric delivers technology, business operation and IT services to providers serving the entire home healthcare continuum.

Industry Standard Technology

Caretinuum's Report Manager was developed using Microsoft's® Reporting Services technology accessing a SQL data model.

Dashboards

What are your key performance indicators? Referrals, census, DSO, orders and staff productivity are easily accessible with Caretinuum's Report Manager. You can set these measures on your dashboard and monitor them closely. Dashboards are a visually-pleasing, quick reference to the issues that are critical to your business.

Drill-Down Reporting

Once a problem is indicated on the dashboard, analyzing the cause is made much easier through the use of Caretinuum's drill-down reporting. Clicking on potential problem areas displays the next level of data, giving you insight into variances.

Charts/Graphs/Tables

Caretinuum's Report Manager offers a variety of charts, graphics and tabular display and output formats. Volumes, trends, and variances are displayed in a format that allows easy analysis and action.

Customized Reports

While Caretinuum's Report Manager comes with a set of standard dashboards and reports, we recognize different lines of business, locations, and organizations will need to build their own dashboards and reports. Caretinuum's Report Manager, utilizing the strength of Microsoft's Reporting Services *Report Builder*, will put this power into the hands of the user. If you don't have the resources to utilize this feature, we'll provide custom report creation as a service to our customers.
