

# PharmMed

a CareCentric Solution

## PharmMed® Home Pharmacy System

Designed by pharmacists, CareCentric's Windows-based home care pharmacy system operates in conjunction with our MestaMed® HME and HHA management systems to fully automate processes unique to home care pharmacies. PharmMed allows pharmacies to enter, process and manage prescriptions and related orders. With its TPN functionality, you can enter physicians' orders exactly as they are given, without the use of a calculator. And to ensure compliance with state regulations, our unique prescription numbering system is completely auditable, saving time on initial and follow-up surveys.

### Key Features and Benefits

#### Easy to use

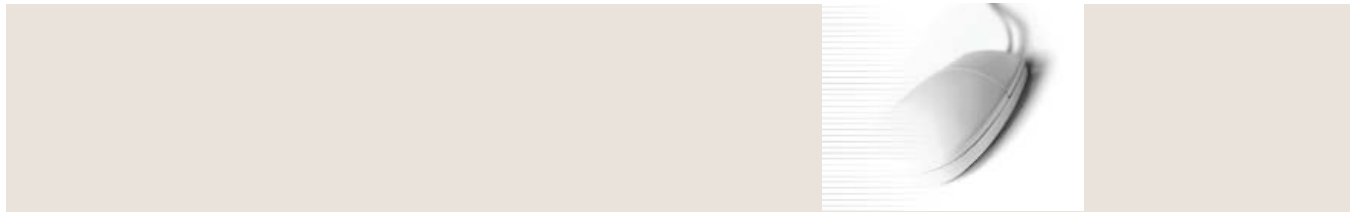

- Pharmacist-friendly terminology in Windows-standard navigation
- Easy access to medication profile data online; conforms to JCAHO standards
- Label accuracy ensured with fast, simple label modification
- Delivery notes feature that makes it easy to add instructions to the delivery ticket

#### Streamlined order process

- Standard order template that allows rapid entry of patient orders
- Real-time modification for increased order accuracy and no excess keystrokes
- Timesaving order entry interface by specific order type, including compounded drug, non-compounded drug, TPNs and supplies
- Automated TPN compounding through direct interface to both Baxa and Baxter TPN compounding applications
- Dramatically reduced prescription processing time for respiratory meds pharmacies, including the ability to utilize thermal laser printers for the labels
- Schedule Order Reports allows for a built-in call center process for batch refill authorization, and fills accommodating small and large pharmacy operations
- Unique batch refill and printing that speeds order processing, and conforms easily and quickly to operational workflow
- Online adjudication of prescription claims to the Pharmacy Benefit Managers using Per-Se Technologies as a switching company and Secure Trans for fast claim submission
- Immediate ability to add new third-party BIN numbers for new insurance claims

#### Enhanced clinical documentation

- Systemwide access to consistent, integrated clinical notes using standard document templates
- Medical records tracking that enables predefined care plans, patient satisfaction surveys and clinical monitoring

## PharmMed®

### Home Pharmacy System

#### Improved operations

- Standard and user-defined notepads for SIG, compounding instructions, auxiliary information and delivery instructions for the delivery ticket
- Note types for accurate record keeping system for call center refill authorizations, including date and time stamp notes by caller
- Flexibility to tailor the system to meet your clinical and business needs
- Increased security at prescription and refill level with required pharmacist ID and password

#### Advanced functionality

- Interface capability to Data Kinetics for pharmacokinetic modeling of potentially toxic drugs
- Access to written consultations, graphical presentations and model results for value-added services
- Compound confirmation and inventory management with perpetual inventory

#### Comprehensive Implementation and Training Services

We provide a variety of implementation services, including project management, application installation and configuration, and startup training. We also offer a continuous schedule of training classes and seminars at our facilities. Upon request, our product experts will deliver customer training and application consulting at your site.

#### Technical Requirements

The PharmMed application is used in conjunction with the MestaMed system, which runs under a range of hardware platforms that includes Windows 2000/NT, SCO UNIX, alpha open VMS, and AIX. This multiplatform versatility makes PharmMed suitable to a wide variety of computing environments.
